

LinkedList::pop_back

LinkedList::remove

LinkedList::get_last

```
graph LR; A[LinkedList::pop_back] --> C[LinkedList::get_last]; B[LinkedList::remove] --> C;
```

The diagram illustrates a relationship between three functions of a LinkedList class. On the left, two white rectangular boxes with black borders contain the text 'LinkedList::pop_back' (top) and 'LinkedList::remove' (bottom). On the right, a gray rectangular box with a black border contains the text 'LinkedList::get_last'. Two blue arrows originate from the right side of the 'pop_back' box and the 'remove' box, both pointing towards the left side of the 'get_last' box. This suggests that both 'pop_back' and 'remove' operations rely on or utilize the 'get_last' function.
