

LinkedList::pop_front

LinkedList::remove

LinkedList::get_first

```
graph LR; A[LinkedList::pop_front] --> C[LinkedList::get_first]; B[LinkedList::remove] --> C;
```

The diagram illustrates a relationship between three function calls. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'LinkedList::pop_front' and the bottom box contains 'LinkedList::remove'. On the right, there is a single gray rectangular box with a black border containing the text 'LinkedList::get_first'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'pop_front' and 'remove' operations rely on or call 'get_first'.
