

MergeSort::sort

```
graph LR; A[MergeSort::sort] --> B[MergeSort::merge_sort]; B --> B;
```

The diagram illustrates the control flow of the MergeSort algorithm. It consists of two rectangular boxes. The first box, on the left, is white with a black border and contains the text "MergeSort::sort". A straight blue arrow points from the right side of this box to the left side of a second box. The second box, on the right, is gray with a black border and contains the text "MergeSort::merge_sort". A curved blue arrow originates from the top of the second box and points back to the top of the same box, representing a self-loop or recursive call.

MergeSort::merge_sort
