

LinkedList::get

LinkedList::get_mut

LinkedList::insert

Node::get_next

```
graph LR; A[LinkedList::get] --> D[Node::get_next]; B[LinkedList::get_mut] --> D; C[LinkedList::insert] --> D;
```

The diagram illustrates a dependency or relationship between three methods of a `LinkedList` struct and a single method of a `Node` struct. On the left, three white rectangular boxes with black borders contain the text `LinkedList::get`, `LinkedList::get_mut`, and `LinkedList::insert` respectively. On the right, a gray rectangular box with a black border contains the text `Node::get_next`. Three blue arrows originate from the right side of each of the three white boxes and point towards the left side of the gray box, indicating that each of the three `LinkedList` methods depends on or calls the `Node::get_next` method.
